

## Appendix 2

### **The assessment of general school travel needs**

*We aim to understand how access to services is experienced differently by different groups in Leicestershire . . . If the role of local councils is to ensure that all people within their authority can easily access these services, then it is vital to understand where they are located, the profile and location of their current and potential users and how easily these users can gain access to them.*

[LTP3 Evidence - An evidence-based approach to the development of our long-term strategy](#)

*Evidence shows that concerted and co-ordinated investment in measures to firstly improve walking, cycling and public transport infrastructure and then to promote its use, can bring about significant changes in travel habits. Over the last three years we have sought to do this via our Local Sustainable Transport Fund (LSTF) projects in Loughborough and Coalville. We will be doing similar work in Hinckley over the coming three years.*
